

mage::Loadable

```
classDiagram
    class mage_Loadable["mage::Loadable"]
    class mage_Engine["mage::Engine"]
    class mage_Input["mage::Input"]
    class mage_Renderer["mage::Renderer"]
    mage_Loadable <|.. mage_Engine
    mage_Loadable <|.. mage_Input
    mage_Loadable <|.. mage_Renderer
```

The diagram illustrates a class hierarchy. At the top is the 'mage::Loadable' class. Below it are three subclasses: 'mage::Engine', 'mage::Input', and 'mage::Renderer'. A horizontal dotted line connects the three subclasses, with a vertical dotted line and an upward-pointing arrowhead connecting this line to the 'mage::Loadable' class, indicating that all three subclasses inherit from 'mage::Loadable'.
